Rushbrook
Primary Academy

Computing Enrichment

At Rushbrook Primary Academy, we are proud to hold

Computing based enrichment opportunities. For example, we have Animation and Coding after school clubs which include LEGO First programming. The children enhance their inschool learning by building on the skills taught and completing projects.

We are proud to have Digital Leaders. They have taken part in many extracurricular opportunities to further develop their roles; we have been on trips to the Apple Store to learn about iMovie and had a memorable day exploring different

technologies, with other Digital Leaders from the borough.

We actively take part in national, annual Safer Internet Days informing both parents and Governors of our plans.
